

CPTYS-A1. Reflectys Composite Nano Hybrid A1. Compules 0.25g x20.

Formulated to meet the requirements of your
most simple to your most complex clinical cases

Since its launch in 2012, Reflectys is one of the best selling dental composites on the market. Itena Clinical simplifies your practice with a universal composite suitable for all cases.

An optimized composition
Reflectys is a light-cured nano-hybrid composite reinforced with nano-fillers. The filler content (80%) is embedded in a Bis-GMA / TGBA resin matrix.
Reflectys contains particles of different sizes and structure that enhance the material's mechanical resistance and aesthetic properties.

Cross section of Reflectys with scanning electron microscope x10000

Results:
■ Easy to handle
■ Easy to sculpt and polish

- INDICATIONS**
Restorations of posterior teeth
Restorations of anterior teeth requiring a higher level of aesthetic
■ Filling of lesions Class I to V
■ Repair of fractured teeth
■ Corrections of the tooth shape and color
■ Primary teeth

Dentin[®] Shade

Universal shades with medium translucency to fit all clinical cases

17 shades available in syringe or capule.

► Your stratifications are optimized, for a natural result

Enamel[®] Shade

Very high translucency. This shade aims to replicate the enamel layer above the opaque shade, bringing luminosity.

Incisal[®] Shade

Very translucent. Developed for enamel young adult restorations and for areas needing natural translucency.

Pedo[®] Shade

Light shade and lightly chalky white. Recommended for primary teeth.
