UP3D UP600 Intraoral Scanner

The All-In-One Digital Dentistry Solution

STREAMLINE YOUR SCANNING WORKFLOW

● **Smart-Anti Fog System**

No more foggy scans! The advanced anti-fog treatment ensures crystal clear results by eliminating exhalation fogging during scanning.

● **True Colour Scanning**

Enhance the patient experience by highlighting true oral colour and delivering a precise margin line for a perfect fit.

● **Intelligent Data Processing**

Automatically removes redundant data from the lips, buccal soft tissue, gloves, enabling you to focus on providing exceptional patient care.

● **Open System**

Experience seamless workflow with the dental design software that exports open format files like (STL, PLY, OBJ).

● **All-in-one Dental Software Solution**

This all-in-one solution simplifies your work process by consolidating each step into easy to use software.

- Weight: 308g
- Depth of Field: 12mm
- Scanning Range: 15 x 13mm
- Full Arch Scanning: <2 mins
- Scanning Head: 45°, 18mm height

The Simple One® For Wet & Dry Suction

DIY Chairside Amalgam Separator

- Due to its compact design, **The Simple One®** amalgam separator can be installed at the side of the chair or in a small cabinet space.
- Easy to operate and maintenance free.
- Preventing mercury build-up in dental suction lines eliminates the need for expensive cleaning maintenance.

Eighteeth

NanoPix

Precise Positioning, Single Shot Capture

Real-time feedback on sensor position enables accurate intraoral exposure, achieving 99.8% success rate.

Smart Angle Feedback, No Holder Required

Real-time angle view display, with auto-lock on the optimal exposure angle to eliminate imaging distortion

Distance Monitoring, Avoid Underexposure

Continuously monitors the distance between the sensor and X-ray to prevent over far exposure distance.
